

WHY AGM BATTERIES?

- 1)** More Cycles, 2 to 3 times Longer Life
- 2)** More deep cycling
- 3)** More resistant to higher temperatures providing longer life
- 4)** More power available
- 5)** Quicker recharging
- 6)** A must have on newer cars due to increased electrical loads
- 7)** Leak proof, no acid to spill
 - No corrosion builds up on connections
 - No need to ever add water
- 8)** Slower self-discharge
- 9)** No acid to stratify
- 10)** More resistant to vibration damage

Higher upfront cost but you save money over the batteries' life span
